

Let Our Experts Guide You

Navigating the ever-changing regulations in natural gas and hazardous liquid pipeline management has never been more challenging. Today's pipeline operators are subjected to mounting public scrutiny while working with more complicated pipeline systems than ever before.

To properly ensure safety and reliability, pipeline operators must show due diligence in developing, implementing and documenting pipeline safety programs that meet Federal and State regulations. However, the industry-wide shortage of regulatory and compliance expertise has left many operators unsure where to turn.

At Integrity Plus, our top technical experts in pipeline regulatory compliance and integrity management bring years of unmatched expertise in U.S. Federal and State regulations, as well as experience with Canadian regulations. Our DOT compliance team guides you through developing, documenting and implementing sustainable pipeline safety compliance programs.

Program Implementation

Backed by years of broad Department of Transportation compliance experience, our team can develop and implement robust pipeline safety compliance programs for pipelines of any size. Our program experience includes integrity management, operations & maintenance, public awareness, operator qualification, control room management, and drug & alcohol programs. We offer on-site support, project management and temporary staffing to ensure a successful implementation and adoption of the program.

Our Offerings

- 49 CFR 195
- 49 CFR 195.452
- CSA
- NEB

Regulatory Applicability Studies

Our compliance experts offer regulatory applicability studies, on-site evaluations, and documented recommendations to help you identify compliance needs.

Process and Procedural Development

Based on regulatory guidance and industry best practices, our team provides process development around client-specific workflows with detailed written manuals. With a focus on transparency, we prepare systematic and repeatable compliance procedures.

Regulatory Audit Support

Our proven compliance experts have trained U.S. Federal and State inspectors and have a strong history of conducting mock audits and compliance status evaluations based on regulatory issues. Additionally, we provide audit strategies and processes focused on transparent compliance demonstrations for regulatory audit preparation.

Reporting

The DOT Compliance team at Integrity Plus offers custom solutions for various reporting requirements. Our regulatory professionals prepare on-time and complete annual reports, accident reports, and NPMS submissions with clearly documented and traceable supporting documents for pipeline operators.
