

Jurisdictional Applicability Studies

Integrity Plus provides regulatory applicability studies, on-site evaluations, and documented recommendations to help pipeline operators identify compliance needs for existing, planned or newly constructed pipelines.

With a strong understanding of the PHMSA regulations regarding hazardous liquid pipeline, 49 CFR 195, and natural gas pipelines, 49 CFR 192, we have a systematic approach to defining pipeline segments and quickly determining regulatory applicability.

Our team can then provide the documentation, rationale, reporting and recommendations necessary to develop your pipeline safety and integrity management program.

Our DOT Compliance Team offers:

- Identification of pipeline segments subject to federal regulation.
- Detailed rationale and documentation to support applicability determinations.
- Best practices for developing detailed jurisdiction analysis for regulatory agency communications.
- Guidance to develop and execute an operator program and minimum safety requirements based on jurisdictional status.

Integrity Plus Experience

- 49 CFR 194
- 49 CFR 195
- 49 CFR 195.452
- CSA
- NEB
- FERC

About Integrity Plus

Integrity Plus, a division of New Century Software, Inc., is an integrity analysis and consulting team dedicated to serving hazardous liquids and natural gas pipeline operators. Integrity Plus goes beyond typical point and “checkbox” solutions by providing holistic strategies that support pipeline operators’ integrity programs and regulatory compliance objectives.

Comprised of pipeline data professionals, integrity management experts, and US Department of Transportation regulatory compliance consultants, Integrity Plus professionals have an industry-proven track record of partnering with both regulators and pipeline operators. Integrity Plus recognizes that each pipeline operation is unique, and that there are no “out of the box solutions” that will facilitate regulatory compliance or effective asset management.

Therefore, Integrity Plus approaches each project as a custom partnering effort, and employs the latest pipeline safety, regulatory compliance, integrity management strategies and technologies to support its clients in meeting their asset management and regulatory compliance goals and objectives.

Integrity Plus is located in Fort Collins, Colorado; Houston, Texas; and Calgary, Alberta, as well as various remote locations. For more information, visit the Integrity Plus website at www.ncintegrityplus.com.
