

ILI & Anomaly Management Services

Astute integrity managers realize there are no easy buttons or shortcuts when it comes to In Line Inspection programs, and nothing can replace the experience of a qualified expert in processing and reviewing your ILI results.

Integrity Plus has extensive experience in reviewing, aligning, and categorizing ILI anomaly data as well as associated process development. Our ILI consulting services team provides unbiased and dedicated ILI support ranging from ILI tool capability consulting to results analysis and interpretation. Our combination of integrity management regulatory expertise coupled with ILI technical experience make Integrity Plus uniquely qualified to support your ILI program goals and objectives.

Program Development & Inspection Support

A successful pipeline assessment starts with developing a solid integrity management program, as well as the selection of tools best suited for your organization. Integrity Plus offers customized consultation to ensure the In Line Inspection process runs smoothly from start to finish to provide you with quality results.

Alignment Services

We can quickly and accurately align ILI data for a low-cost, fixed fee. With your data properly aligned, you can more accurately locate anomalies revealed during pig inspections. When you accurately locate irregularities revealed during inspections, you can save money when digging to perform pipeline repairs.

Integrity Plus Experience

- 35 Years Combined Experience
- 150,000 Miles of Pipeline
- Top Tools on the Market
- Superior Customer Service
- Unmatched Regulatory Knowledge

Assessment Services

Integrity Plus's ILI team quickly processes data and transforms it into knowledge to identify actionable anomalies and support better planning, monitoring and decision-making. As an independent consulting firm, Integrity Plus offers extensive experience in converting and integrating gas and liquid pipeline data regardless of the vendor or tool used.

Result Integration & Support

Rather than treat each ILI as a separate, standalone inspection, industry regulations and best practices focus on the integration of multiple data sets. Integrity Plus offers planning, reporting, and regulatory support to ensure your data is effectively integrated to help give a clearer picture of your pipeline's integrity.
